EDUCATION

Open University — Diploma of HE in *Computing & IT*

Sep 2012 - July 2016

Modules

- Software development with Java (M256)
- Object-oriented Java programming (M250)
- Using Mathematics (MST121)
- Algorithms, data structures and computability (M269)
- Web technologies (TT284)
- Technologies in practice (TM129)
- My digital life (TU100)

Prior to getting my Diploma of Higher Education from the open university I took a science and engineering foundation course at Loughborough University where I studied: Introduction to programming (python), physics and materials, applicable mathematics, product design, business skills for engineers & scientists.

I am proactive and have always been a team player, committed to contributing to my community and environment. I was a prefect at secondary school, student council form rep in sixth form and on my student hall committee at Loughborough as the Raise and Give rep. I helped win an award for our hall for a fundraising trip and collectively the whole Raise and Give team were the first student fundraising organization to raise over one million pound for charity in a year.

WORK HISTORY

Muthers Studio, Birmingham — *Assistant manager*

Feb 2019 - PRESENT

I am currently working at a music studio that provides recording and rehearsal facilities with a 120 capacity venue regularly hosting live events.

As an assistant manager my responsibilities include ensuring the business is open and closed at the right times, social media, organising events and I am currently building a new website for the business. Pre-covid I would also manage a small bar and kitchen team during events which occurred on most weekends. I am a key holder to the business and have my personal license.

SKILLS AND SOFTWARE

HTML, CSS, Bootstrap,
JavaScript, Shopify - Liquid,
Linux & Windows, Video &
Photo editing

Past experience: Java, Python,
Visual Basic

Learning: React, MongoDB,
Express, Node.js, Wix -velo

Learn React

Create a Professional Website with Velo by Wix

LANGUAGES

English (Native)
German(Basic)

Over the last five years I have also performed as a semi-professional musician, playing in venues across the country. I have personally been responsible for band management, concert bookings and digital marketing. A recent single campaign that I led generated over 7000 Spotify streams, 8000 Facebook video plays and I built and launched a website with an ecommerce platform to create a stream of revenue whilst live events are postponed.

The rest of my work history consists mostly of marketing and hospitality roles, which developed my confidence and ability to work under pressure in fast pace environments and adaptability to constantly changing briefs.

- Promotional marketer and brand ambassador
Freelance
2017-2019
- Bartender
Loughborough Student Union, The Sun On The Hill
2009-2011, 2014-2017
- IT and Properties Helpdesk
Optimax Laser Eye Surgery
2011-2014

For this role I offered front line remote IT support and travelled to set up IT and networks for new clinics across the country. I moved to the properties department, organising the maintenance of the businesses many buildings but retained some of my IT responsibilities.
